

## Appendix A. Hallstatt sample pedigree documentation

- (1) List of pedigreed subjects
- (2) Constructed pedigrees

### Notes:

- (a) Some ages recorded reflect the age-at-death listed in church death records. For  
☐ this reason, they may not reflect the number of years between a listed date  
☐ of birth and date of death.
- (b) Date-of-birth for people born outside of Hallstatt has been calculated based on  
☐ date of death and their listed age-at-death.
- (c) Pedigrees are meant to represent generational relationships between pedigreed  
☐ members of the Hallstatt skeletal sample ONLY. Only those individuals  
☐ directly relevant to the calculation of degree of relatedness are shown;  
☐ brothers, sisters, and other relations not present in the skeletal sample are  
☐ NOT included in the drawn pedigrees unless they link measured crania  
☐ between two distinct generations. Likewise, birth order of multiple  
☐ children is not necessarily reflected in the pedigrees.
- (d) Pedigree symbols:

Pedigreed female from Hallstatt sample

Pedigreed male from Hallstatt sample

Female not represented in Hallstatt sample

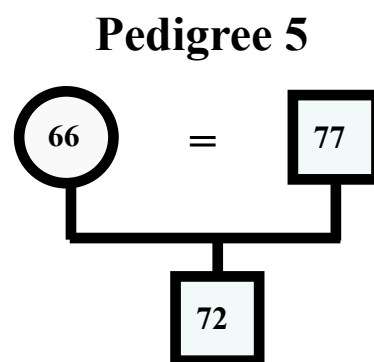

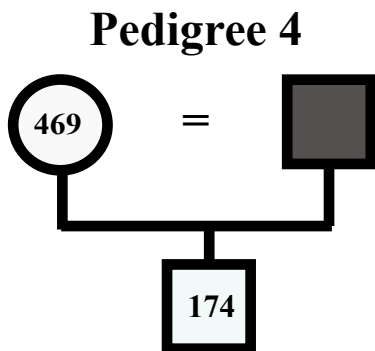

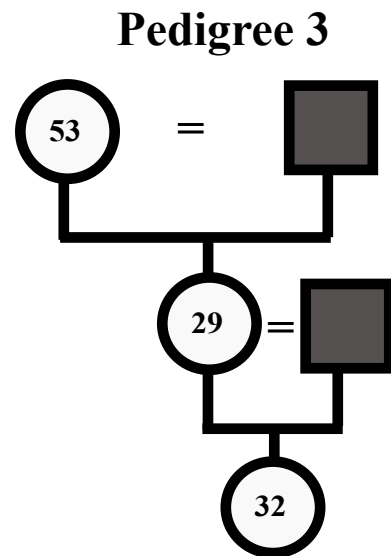

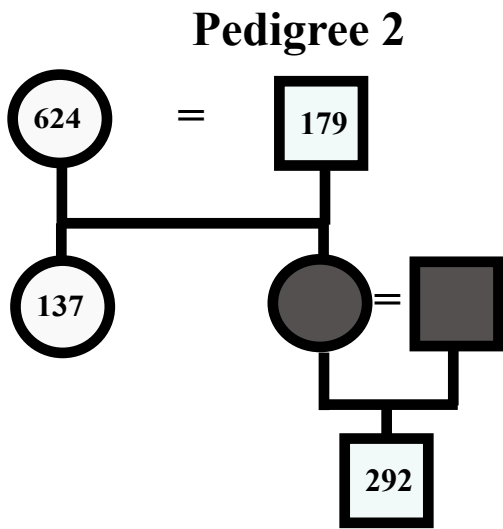

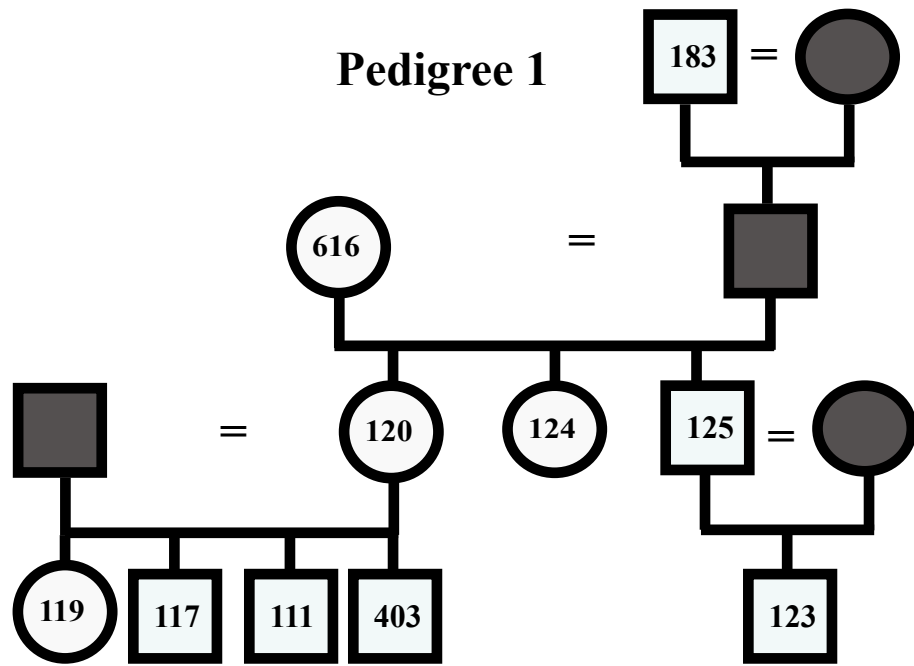

Male not represented in Hallstatt sample

=

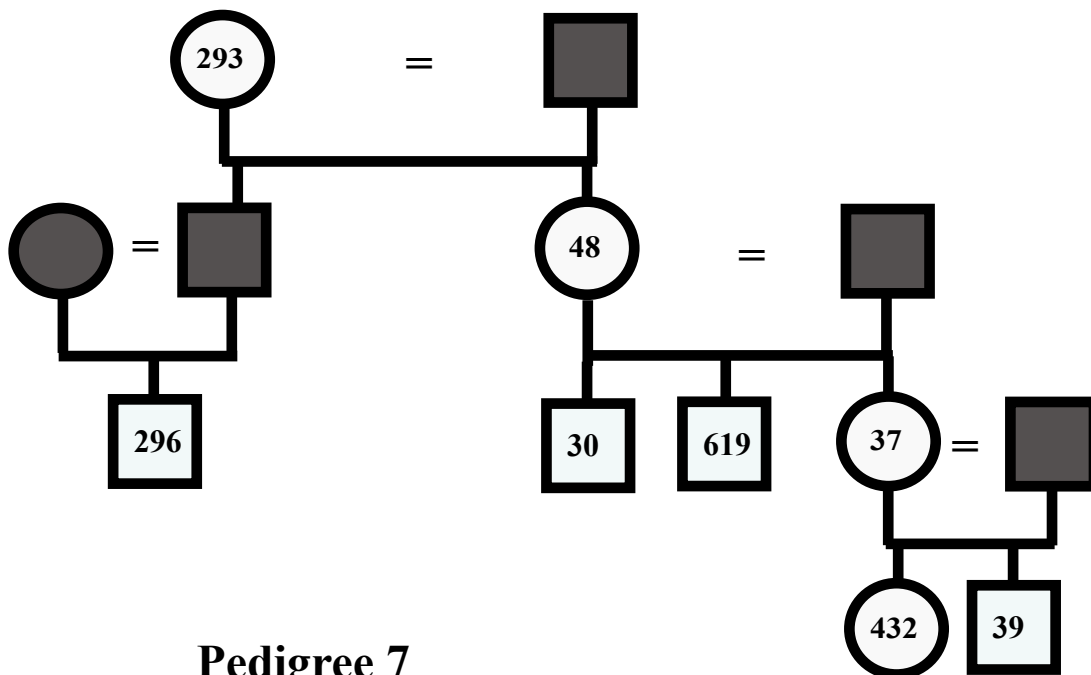

Marriage of two individuals on same level

#

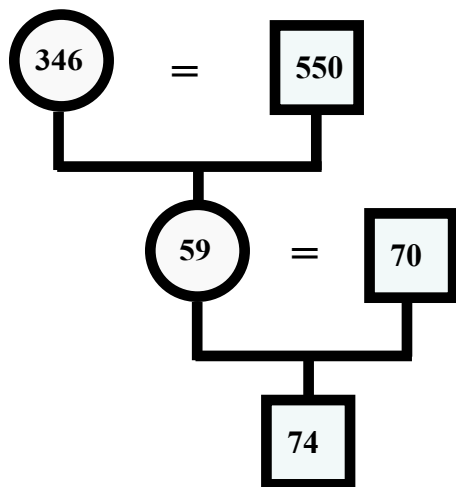

Number of multiple marriages
